SHIMIZU KAZUHISA**(54) METHOD FOR PRODUCING BLOCK COPOLYMER-MEDICINE COMPOSITE MATERIAL**

(57)Abstract:

**PROBLEM TO BE SOLVED:** To provide a method for producing a block copolymer-medicine composite material which can be industrialized, without performing dialysis or ultrafiltration and not using a halogenated hydrocarbon.

**SOLUTION:** This method for producing the block copolymer-medicine composite material is characterized by comprising steps of dissolving an AB type block copolymer having a hydrophilic polymer structure part and a hydrophobic polyamino acid structural part, and the medicine in water or a mixed solvent of water with a low boiling point organic solvent miscible with water, and concentrating the solution.
